Ingersoll Rand
Security Technologies

Ingersoll Rand: a complete security solution for postal facilities.

After-sale service that sets the bar higher.

From factory-direct service to the most extensive network of consultants, distribution partners and small business partners in the country, Ingersoll Rand delivers unmatched capability, flexibility and quality to support your security solution.

The best value for your budget.

What sets Ingersoll Rand apart is its complete range of products and customer-focused services. We create dependable security solutions that leave your buildings secured and your budget intact.

Access management for every application.

Ingersoll Rand can easily accommodate your need for varying levels of security and accessibility across a large complex or within a small local branch. Our safety and security solutions are tough, reliable, versatile and built to last.

Our range of products for postal facilities includes:

- Access management systems
- FIPS 201 compliant smart cards and readers
- CCTV/digital video surveillance and retrieval
- Primus® XP keys and key systems for areas that require high security and complete key control

Purchasing within your existing network.

Our sales and distribution through Integration and VAR alliances allows you to purchase through your established and trusted relationships, minimizing your operational risk. Since licenses do not need to be purchased at the branch level you also save on the contract and administration costs.

Cooperative purchasing from GSA Schedule 84.

Cooperative Purchasing Bill H.R. 3179 allows state and local procurement offices to take advantage of pre-approved pricing and process efficiencies. We offer electronic and biometric access control systems, mechanical locks, portable security closers and exit devices, steel doors and frames, architectural hardware, and technologies and services for government secure markets.
